SKILLS

C#

.NET Core

ASP.NET Core

React.js

TypeScript

SQL Server

Azure Functions

Azure Service Bus

Entity Framework Core

REST APIs

OAuth 2.0

JWT

CI/CD

xUnit

Microservices

EDUCATION

B.Tech in Information Technology

United College of Engineering and Research, AKTU Lucknow

2018 - 2022

LANGUAGES

English (Professional)

Hindi (Native)

ABOUT ME

Full Stack .NET Developer with over 4 years of experience building enterprise-grade applications. Proven expertise in C#, .NET Core, React.js, and Azure cloud services. Skilled in designing scalable microservices, optimizing database performance, and implementing secure authentication protocols to deliver robust software solutions.

WORK EXPERIENCE

May 2023 - Present

Software Developer

Cogitate Technology Solutions | Mumbai, India

- Engineered scalable enterprise backend services using C#, .NET Core, and Entity Framework Core.
- Developed responsive web applications with React.js, Next.js, and TypeScript, utilizing reusable components to enhance UI consistency.
- Orchestrated cloud-based asynchronous workflows using Azure Functions, Service Bus, and Blob Storage for decoupled document processing.
- Optimized SQL database performance through advanced indexing, stored procedure tuning, and efficient LINQ operations.
- Implemented robust security measures including JWT, OAuth 2.0, and Azure AD SSO to ensure data integrity and secure access.

May 2022 - Apr 2023

Associate Developer

Cogitate Technology Solutions | Mumbai, India

- Built data-driven web applications using ASP.NET MVC, Razor Views, and JavaScript.
- Created and consumed RESTful APIs to facilitate seamless data exchange between internal and external systems.
- Authored comprehensive unit tests using xUnit, NUnit, and Moq to maintain high code quality and system reliability.
- Collaborated with cross-functional teams to implement features and resolve technical debt in legacy systems.

NOTABLE ACHIEVEMENTS

Engineered a high-performance insurance quoting platform by integrating multi-carrier REST APIs and automated document generation.

Developed a configurable low-code workflow engine utilizing JSON-driven forms to streamline business process automation.

Optimized complex SQL queries and database operations, significantly improving application data retrieval and processing efficiency.

PROJECTS

Insurance Policy Quoting Platform

Full Stack Developer

- Integrated multi-carrier REST APIs to enable real-time insurance quoting and issuance.

- Automated document generation workflows using .NET Core APIs and DocxTemplater.

Low-Code / No-Code Platform

Full Stack Developer

- Designed a configurable workflow engine using React.js and TypeScript for dynamic form generation.
- Implemented backend logic in .NET Core to support complex, JSON-driven business processes.

ACCOMPLISHMENTS

Certifications

- • .NET Full Stack Foundation
- • Introduction to .NET Core
- • Meta – React.js
- • Generative AI
- • Python for Everybody
