Mumbai, India

PROFESSIONAL SUMMARY

Full Stack .NET Developer with 4+ years of experience building enterprise applications using C#, .NET Core, ASP.NET Core, REST APIs, React.js, TypeScript, JavaScript, Entity Framework Core, SQL Server, and Azure. Experienced in developing scalable APIs, microservices, dynamic web applications, cloud-based solutions, third-party integrations, and automated document workflows. Strong understanding of OOP, SOLID principles, design patterns, database optimization, authentication, asynchronous processing, CI/CD, and Agile development.

TECHNICAL SKILLS

Languages:	C#, JavaScript, TypeScript, SQL, HTML5, CSS3
Backend:	.NET, .NET Core, ASP.NET Core, ASP.NET MVC, Web API, RESTful APIs, OData, Microservices, Entity Framework Core, LINQ, Lambda Expressions, ADO.NET
Frontend:	React.js, Next.js, TypeScript, JavaScript, React Hooks, jQuery, Razor Views, Bootstrap, Responsive UI, JSON-driven Forms
Architecture:	OOP, SOLID Principles, Design Patterns, N-Tier Architecture, Microservices, Event-Driven Architecture, Dependency Injection, Asynchronous Programming
Cloud & Azure:	Azure Functions, Azure Service Bus, Topics, Subscriptions, Azure Blob Storage, Azure Key Vault, Application Insights
Security:	JWT, OAuth 2.0, Authentication, Authorization, Azure Active Directory, SSO
Database:	SQL Server, MySQL, Stored Procedures, Views, Indexing, Transactions, Query Optimization
DevOps & Testing:	Azure DevOps, Azure Repos, Git, CI/CD, Postman, xUnit, NUnit, Moq

EXPERIENCE

- Cogitate Technology Solutions** Mumbai
Software Developer May 2023 – Present
 - Application Development:** Built enterprise applications and backend services using C#, .NET Core, ASP.NET Core Web API, Entity Framework Core, LINQ, and SQL Server.
 - Full Stack Development:** Created responsive web applications using React.js, Next.js, TypeScript, JavaScript, HTML5, and CSS3 with reusable components and JSON-driven forms.
 - API & Microservices:** Designed RESTful APIs, OData services, and microservices for internal systems and third-party integrations, supporting real-time and parallel data exchange.
 - Azure Solutions:** Delivered cloud-based workflows using Azure Functions, Service Bus, Blob Storage, Key Vault, and Application Insights for asynchronous processing, document generation, storage, and monitoring.
 - Database & Performance:** Tuned SQL queries, stored procedures, indexes, and LINQ operations while implementing pagination and asynchronous processing to improve application performance.
 - Security & Integration:** Worked with JWT, OAuth 2.0, Azure Active Directory, SSO, authentication, authorization, and secure API integrations.
 - Engineering Practices:** Applied OOP, SOLID principles, design patterns, dependency injection, unit testing, Git, Azure DevOps, CI/CD, code reviews, and Agile/Scrum practices.
 - Production Support:** Investigated and resolved application, integration, database, performance, and production issues while collaborating with cross-functional teams.
- Cogitate Technology Solutions** Mumbai
Associate Developer May 2022 – Apr 2023
 - ASP.NET MVC:** Built data-driven web applications using C#, ASP.NET MVC, Razor Views, JavaScript, jQuery, HTML5, CSS3, and Bootstrap.
 - API Development:** Created and consumed RESTful APIs for communication between internal applications and third-party services.
 - Data Access:** Worked with Entity Framework Core, LINQ, Lambda Expressions, stored procedures, transactions, and SQL Server for application data access.
 - Business Workflows:** Applied business rules, validations, reusable components, and data processing workflows across enterprise insurance applications.
 - Testing & Maintenance:** Created unit tests using NUnit, xUnit, and Moq; diagnosed application issues and supported production fixes and enhancements.

PROJECTS

- **RPS – Insurance Policy Quoting Platform:** Full Stack insurance platform supporting Homeowners and Condo policies across admitted and non-admitted markets. Worked on quoting, rating, binding, issuance, renewals, endorsements, and cancellations.
 - **Carrier Integrations:** Integrated multiple carrier APIs for real-time quotes, underwriting, premium, tax, and policy information using RESTful services.
 - **Dynamic Forms:** Built configurable JSON-driven forms and reusable UI components using React.js, TypeScript, JavaScript, and business rules.
 - **Automation:** Automated document generation, notifications, and asynchronous workflows using .NET APIs, Azure Functions, Azure Service Bus, and DocxTemplater.
 - **Data & Performance:** Developed stored procedures, SQL queries, indexing, pagination, and data transformation logic using SQL Server, Entity Framework Core, LINQ, and JSONata.
- **LCNC – Low-Code/No-Code Platform:** Built configurable workflows and document-generation solutions using React.js, .NET Core APIs, Azure Functions, TypeScript, JSON-driven forms, DocxTemplater, and PizZip.
- **Insurance House:** Created dynamic forms and RESTful APIs using JavaScript, Handlebars.js, and .NET to support configurable insurance workflows.

EDUCATION

- **United College of Engineering and Research** Allahabad, AKTU Lucknow
B.Tech in Information Technology; CGPA: 8.00 2018 – 2022
